

SUMMER HALSEY

Full-Stack Engineer

Arizona | summer.halsey0318@gmail.com | [Linkdin](#) | github.com/summer-marie | shalsey.dev

PROFILE SUMMARY

Full-Stack Engineer focused on solving real-world problems through thoughtful software design, systems architecture, and AI-assisted development. Experienced delivering production software for clients, translating complex operational challenges into practical solutions, and building secure, maintainable applications with a documentation-first engineering approach.

KEY PROJECTS

Verity — Product & Platform Engineering (my-verity.com)

Privacy-first AI platform translating complex supervision documents into plain language.

- Designed a source-grounded AI system for accurate, context-specific document interpretation.
- Built secure document architecture with ownership, authorization, and lifecycle privacy controls.
- Established a documentation-first workflow using product requirements, architecture specifications, and implementation plans.
- Developed testing strategy and architectural safeguards for maintainability, security, and data integrity.

Lakonic Assurance — Client Engineering Partnership (lakonic-assurance.com)

Served as the technical partner for a growing civil engineering firm, modernizing its website and establishing sustainable development workflows.

- Led migration from a legacy site to a modern web application while preserving client branding.
- Designed a scalable large-document upload solution to overcome platform limitations.
- Established GitHub workflows and provided technical knowledge transfer directly to the client.
- Created a maintainable foundation for continued digital growth.

TECHNICAL SKILLS & EDUCATION

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frameworks: React, Next.js, Node.js, REST APIs, Prisma, PostgreSQL, Tailwind CSS

Architecture & AI: Documentation-First Development, System Architecture, OpenAI API, RAG, OCR Pipelines, Prompt Engineering

Testing & Tools: Vitest, Playwright, Git, GitHub, Vercel, VS Code

Next Chapter

AI-Assisted Software Engineering Program, 2026

Persevere Code Camp

Full Stack Development Program, 2025

PROFESSIONAL EXPERIENCE

Independent Software Engineer | 2025–Present

- Collaborated directly with business owners to translate operational challenges into production-ready software solutions.
- Designed, developed, and deployed a production e-commerce platform for a local business, managing the project from planning through launch.
- Led the successful delivery of a client website by balancing rapid implementation with collaborative planning and technical guidance.

- Expanded full-stack engineering expertise through independent product development, client engagements, and advanced software engineering training.
